Ran cement bond log, found essentially no cement bonding from 3000' to 5600'. It was decided that squeeze cementing to effect separation of the Grayburg formation was too risky and costly. We request that our Form C-101 approving recompletion in the Grayburg formation (approved 6-3-71) be cancelled. Well was capped w/4000# master valve and returned to temporarily abandoned condition.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
