8-18-76: The Sinclair-Williams #1 well is an old depleted Eumont gas well. We intend to deepen this well to the Grayburg as a replacement well to our Williams #2 (Unit 0 34-19-37) which was ruined due to excessive pressure behind the casing. We will deepen this well to 3860 and run 3 1/2" tubing for the oil string, which will be cemented to surface. We will perforate the upper Grayburg section from approx. 3785 to 3600 and treat this zone with acid and water, frac if necessary.
