Re: Request for Non-standard Proration Unit
Eumont Gas Pool - SW 1/4 Section 3-20S-37E
Lea County, New Mexico

Gentlemen:

In accordance with Order R-520 the undersigned hereby requests a non-standard proration unit consisting of 160 acres covering the SW 1/4 of Section 3, Twp. 20 S., Rge., 37 E., Lea County, New Mexico.

All of the lease owners in the Southwest quarter of the above captioned tract comprising Tennessee Production Company, J. Hiram Moore, John Barnett, Ernest A. Hanson and Carper Drilling Company, Inc., have executed a working agreement to operate a gas well on this tract.

The Tennessee Production Company, Ellen Veir No. 1 well was completed as an oil producer on May 9, 1952, in the Monument Pool. The oil zone in this well has been depleted and the operators plan to plug back and complete from the Eumont gas zone. Notice of intention to recomplete this well was filed with the Commission and approved July 9, 1954.

Waivers have been obtained from offset operators and copies are enclosed herewith, in accordance with Rule R-370A. These waivers are also in accord with Rule 5, Order R-520.

The request for 160 acre gas proration unit is in accordance with the Commission rules and regulations and it is requested that the Commission grant the formation of this unit.

Yours very truly,

TENNESSEE PRODUCTION COMPANY
