Re: Amended application to dually
complete Cities Service Oil
Company's Laughlin No. 5, Lea
County, New Mexico

Gentlemen:

By means of this amended application, Cities Service Oil Company wishes to state the following:

1. That Cities Service Oil Company originally made application to dually complete Laughlin No. 5 in the SW/4 of SW/4 of SE/4 Section 5, T20S, R37E, Lea County, New Mexico in such a manner as to produce oil from the Elinebry formation through the tubing, and gas from the Queen-Seven Rivers formation through the tubing-casing annulus. Permission to do this was granted by the New Mexico Oil Conservation Commission by Administrative Order No. DC-4, effective July 28, 1953.
2. That the said well was drilled into the Elinebry formation to a total depth of 5743' and after thorough testing, the Elinebry formation was found to be non-commercial.
3. That the Cities Service Oil Company then contacted the Commission and obtained temporary approval to plug back, test the Paddock formation, and if found productive of oil, to make a dual completion with the Paddock formation producing oil through the tubing and the Queen-Seven Rivers producing gas through the annulus.
4. That the applicant has now dually completed said well to produce oil from the Paddock formation through the tubing, and gas from the Queen formation through the tubing-casing annulus in the following manner:
 - (a) Plugged back to 5224'.
 - (b) Perforated the 5 $\frac{1}{2}$ " casing from 5190 to 5215 opposite the Paddock formation.

On 10/10/1964, the following information was received from the
Bureau of the Census, Washington, D.C. regarding the 1960
Census of the United States, which was conducted on April 1, 1960.
The census was conducted by the Bureau of the Census, which is
a part of the Department of Commerce, and is the largest
statistical agency in the United States. The census is
conducted every ten years, and the results are used for
many purposes, including the determination of the number of
people in the United States, the distribution of the population,
and the characteristics of the population.
