DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The subject well was originally completed 3-1-50 at a total depth of 3895', and has been shut in since August 1, 1950, due to 100% water production.

In an effort to shut off water and restore oil production, it is proposed to plug back into the base of the 5 1/2" casing, which is set at 3811', and test the following zones:

- (1) 3790 to 3796' (2) 3764 to 3784' (3) 3744 to 3757'
- 3800 to 3806'

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
