Hobbs, New Mexico

Gentlemen:

Commission Rule 111 requires that a directional survey be filed with the Commission in the event the deviation from vertical in any five hundred foot interval averages more than  $5^{\circ}$  on any well drilled or deepened. In deepening your G. C. Matthews Well No. 6-I located in Section 6, T-20-S, R-37-E deviation in excess of  $8^{\circ}$  was noted between the interval 8916' to 9460'.

Under the provisions of Rule 111 it will be necessary that you run a directional survey on this well and file the results with this office. No allowable will be assigned this well until the survey has been filed in this office.

Yours very truly,

OIL CONSERVATION COMMISSION

Joe D. Ramey  
Proration Manager
