12. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Request a postponement of the annual shut-in pressure test (pursuant to Division Rule No. 402) Unable to test July- September 8/9/01-Suspect well had developed a scale problem.- pump 500 gallons 15 % HCL

8/23/01- Tag sand fill

8/24/01- Bailed sand

8/25/01 - Pump 1000 gallons x-25 - shut in well for 36 hours

8/27/01 -The well locked up- unable to sustain a flow rate into the gas sales line.

9-6/01 -Pumped 37,500 SCF nitrogen gas with 2000 gallons of acid.

9-7/01-Swab well- kicked off

Since that time, the flow rate of the well has improved each day.

Well flowed 813 mcf 9/26/01- 766 mcf on 9/18/01- 668 mcf on 9/10/01.

The well is still cleaning up.

Sapient believes that it would be a mistake to shut the well in now. Shutting the well in now would allow the fluids and precipitates that damaged the well to remain in place and possibly create irreparable harm to the well.

We feel that we can shut the well in for a gas test in mid to late October.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
