(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

In response to the BLM's letter of 7-24-00 and our Sundry Notice dated 11-27-00 (approved 12-27-00), we hereby propose the following well work:

Move in well service unit.

Drill retainer at 1210', and cement, from 1212' to 1310'. Pressure test 7" O.D. casing, from 0' to 3034'.

Drill retainer at 3034'. Drill cement below retainer.

Log well with DS-CNL-GR-CCL log and VDCBL-GR-CCL log.

After evaluation of logs, perform additional cementing, as necessary.

Re-perforate and acidize Queen-Penrose gas interval, if previously productive Queen gas zone does not appear to have been watered out by crossflow of water, from Grayburg into Queen, prior to CIBP being set at 3709', in 1991.

14. I hereby certify that the foregoing is true and correct
