(1) Perforate the 5-1/2" casing within the approximate interval of 3185' - 3395' in the Eumont Gas Pool.

(2) Set production type packer below these perforations at approximately 3450' to separate the two pay zones.

(3) Produce the Monument Pool oil through the tubing and the Eumont gas through the tubing-casing annulus.

(d) That the granting of this application for permission to produce the well as a dual completion with gas from the Eumont and oil from the Monument is in the interest of conservation and the protection of correlative rights.
