DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

8-5/8" 32# 8-1/2". New Seamless casing was set in this well at 2321' and cemented by the Halliburton Method with 500 sacks.

Casing and fittings were tested with 1200# pump pressure and allowed to stand for thirty minutes undisturbed. No drop in pressure resulted. The cement was then drilled out of the casing and the same test of 1200# pump pressure again applied and allowed to stand undisturbed for thirty minutes. No drop in pressure resulted so the drilling was then resumed.
