

NEW MEXICO STATE LAND OFFICE
OFFICE OF THE STATE GEOLOGIST
SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	REPORT ON DEEPENING WELL
REPORT ON RESULT OF SHOOTING WELL	REPORT ON PULLING OR OTHERWISE ALTERING CASING
REPORT ON RESULT OF TEST OF WATER SHUT-OFF	REPORT ON REPAIRING WELL
REPORT ON RESULT OF ABANDONMENT OF WELL	REPORT ON ACID TREATMENT X

Hobbs, New Mexico March 21, 1934
PLACE DATE

Mr. E. H. Wells State Geologist,
Santa Fe, N. Mex.

Following is a report on the work done and the results obtained under the heading noted above at the

Stanolind Oil & Gas Company Capps Well No. 8 in the
COMPANY OR OPERATOR LEASE

SW 1/4 of Sec. 3, T. 19 S, R. 38 E, N. M. P. M.,
Hobbs Oil Field, Lee County.

The dates of this work were as follows: Acid treatment on March 17, 1934

Notice of intention to do the work was (~~submitted~~) submitted on Form SG 105 on
February 2, 19 34, and approval of the proposed plan was (~~submitted~~) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Well was treated with 2,000 gallons 60% commercial Hydrochloric acid solution on March 17th. The well was shut in and left shut in for forty eight hours, until March 19th, when it was swabbed in. The well was then allowed to flow at its production allowable until the official production test which was made on March 20th. The potential before acid treatment was 1106 barrels of oil with 1,126,000 cubic feet of gas. After acid treatment the potential is 3625 barrels of oil with 3,500,000 estimated cubic feet of gas, an increase of 325%. Open flow test through tubing on production test was 2916 barrels, which placed on tubing-casing curve gave the well a new potential of 3625 barrels for open flow.

DUPLICATE

Subscribed and sworn to before me this

21st day of March, 19 34.

THE HISTORY OF THE UNITED STATES

OF THE UNITED STATES OF AMERICA
1776-1876
The history of the United States is a story of a young nation that grew from a small colony of settlers to a great power. It is a story of the struggles of the people to establish a government that would protect their rights and promote their welfare. It is a story of the triumphs of the American spirit and the sacrifices of the American people.

The story begins with the first settlers who came to the New World in search of a better life. They found a land of opportunity and freedom, but they also found a land of hardship and danger. They fought for their survival and for their right to self-government. They established a government that was based on the principles of liberty and justice for all. They fought for their rights and for the rights of others. They were the first to establish a government that was based on the consent of the governed.

The story continues with the growth of the nation. The population increased and the territory expanded. The people fought for their rights and for the rights of others. They established a government that was based on the principles of liberty and justice for all. They fought for their rights and for the rights of others. They were the first to establish a government that was based on the consent of the governed.
