

NEW MEXICO OIL CONSERVATION COMMISSION  
MISCELLANEOUS REPORTS ON WELLS

(Submit to appropriate District Office as per Commission Rule 1106)

COMPANY Pan American Petroleum Corporation Box 68 Hobbs, New Mexico  
(Address)

LEASE State "A" Tract 1 WELL NO. 26 UNIT F S 4 T 19 R 38

DATE WORK PERFORMED 3-4-57 to 4-15-57 POOL Hobbs

This is a Report of: (Check appropriate block) ☐ Results of Test of Casing Shut-off  
☐ Beginning Drilling Operations ☐ Remedial Work  
☐ Plugging ☒ Other Casinghead installation  
Casing leak inspection

Detailed account of work done, nature and quantity of materials used and results obtained.

For the purpose of testing oil string and intermediate casing for leaks, the cellar was excavated and 2" tubing risers brought to ground level from both surface and intermediate casingheads. Valves were installed on lines above ground level. For purposes of identification, the pipe connecting to surface head was stamped with letters "SUR" and that connecting to the intermediate head with the letters "INT". On April 3, 1957 an inspection was made by Mr. E. J. Fischer, District Engineer, NMOC to ascertain that all valves and lines were open between ground level and the casingheads. The cellar was then filled with earth.
