**FULL DETAILS OF PROPOSED PLAN OF WORK**  
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Notice of intention to repair a casing leak was submitted on Form C-103 dated September 28, 1953. In an effort to determine what procedure would be most satisfactory in making this repair we propose work as follows: move in rotary rig and kill well with least circulation material, pull the tubing and packer, set a drillable bridge plug in the shoe joint of 6-5/8" casing and test casing to locate lowest leak with retrievable retainer, and locate free point of casing with survey. As soon as the location of leaks and free point is found, subsequent Form C-102 will detail work planned.
