Mr. **R.L. Halley** April 23, N. Mex., 4-23-1928  
State Geologist,  
Socorro, New Mexico. Carlsbad, New Mexico.

Dear Sir:

Following is a report giving the results of work done as indicated above at **Hobbs High**  
Well No. **1** in **Ne 1** of Sec. **9** T. **19** R. **38**  
N. M. P. M., Oil Field **Lea** County.

The plan outlined on Form SG. ----- was followed except: We ran 110 joints of  
10" 45# 8thd casing and cemented it at 3057' 1" measurement from the  
derrick floor. We then dumped 10 sacks of Santa Cruz cement mixed with  
60# Calcium Chloride into the hole and lowered the pipe into it. We  
will allow cement to set four days when we will start up and go ahead.  
There will be no Test of Water shut-off as the hole was dry and in  
good condition. ~~We bradenhead~~ the gas off between the 10" and 12 1/2"  
The results were as follows: (Give details)

casing and intend to use same for fuel until the well is completed.  
In case commercial production is encountered we will lubricate the gas  
and mud it off. In case it is not encountered the gas will be mudded  
off when the pipe is pulled and well abandoned.
