Lee County.

-38

FULL DETAILS OF PROPOSED PLAN OF WORK  
FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

On October 23, 1949, at 4:00 p.m. 72 hours will have elapsed since running 3367' of 9-5/8" casing set at 3337' and cemented with 1500 sacks. Cement will be circulated to surface. Pipe and water shut off will be tested by applying 1000 psi pressure and holding for 30 minutes before and after drilling cement plug. If pressure drop in excess of 100 psi occur on either test proper remedial measures will be carried out.

Approved OCT 20 1949, 19\_\_\_\_  
except as follows:

Stanolind Oil and Gas Company  
Company or Operator  
By H. W. Harnden

Position Production Foreman  
Send communications regarding well to

THE UNIVERSITY OF CHICAGO  
DEPARTMENT OF CHEMISTRY  
RESEARCH REPORT

1. The first part of the report describes the experimental work carried out during the year 1955. The results of the experiments are presented in the form of tables and graphs. The second part of the report discusses the theoretical aspects of the problem and compares the experimental results with the theoretical predictions. The third part of the report contains a summary of the work and a list of references.

2. The experimental work was carried out in the laboratory of Professor J. H. Goldstein. The results of the experiments are presented in the form of tables and graphs. The theoretical aspects of the problem are discussed in the second part of the report. The summary of the work and the list of references are given in the third part of the report.

3. The experimental work was carried out in the laboratory of Professor J. H. Goldstein. The results of the experiments are presented in the form of tables and graphs. The theoretical aspects of the problem are discussed in the second part of the report. The summary of the work and the list of references are given in the third part of the report.
