(Company or Operator)

Well No. **1** in **M**

(Unit)

SW 1/4 **SW** 1/4 of Sec. **36**, T. **19-S**, R. **36-E**, NMPM., **Monument** Pool

(40-acre Subdivision)

Pool

Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

3808' D.O.D.

This well previously produced gas through the braden head, but that section has plugged itself off and will no longer produce gas.

We intend to dually complete this well by perforating the 7" OD casing from 3274' to 3352' in the Queen formation. Run 3 1/2" OD EUE tubing with dual completion equipment and acidize with 500 gallons of regular acid. If necessary, sand-oil the same zone with 10,000 gallons of oil and 10,000 pounds of sand. Run 1 1/2" tubing with 1" pump and 5/8" rods. Dually complete to pump oil from San Andres through the 1 1/2" tubing and produce gas from the Queen sand through the casing-tubing annulus.

Approved....., 19.....
