D. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give orientation direction and estimated true and magnetic depths for all sections and zones pertinent to this work.)

On December 2, 1996, a casing integrity test was run with and OCD Representative present. There was a leak on the annulus and communication was not established on the tubing. We plan to pull the packer and determine if there is a packer failure or another problem with the well.

I hereby certify that the foregoing is a true and correct statement.
