17 April 1979

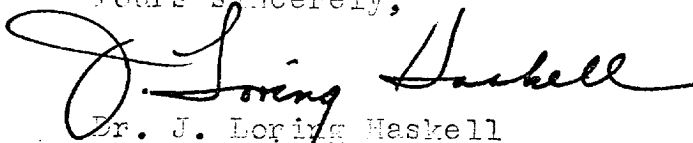

Mr. Randy Atkins
Administrative Analyst
Amoco Production Company
P.O. Drawer A
Levelland, Texas 79336

Dear Mr. Atkins:

Enclosed please find NMAS' Archaeological Clearance Report for Amoco Production Company's proposed Gillyully Federal Gas Com. Well No. 17 in Lea County, New Mexico. During the course of the reconnaissance, three anhydrous quartz secondary decortication flakes were observed on the location. These remains represent the end product of en passant activities, and hence we are suggesting clearance for Amoco's project.

If you have any questions pertaining to our report, please call my office. Thank you for asking NMAS to do this reconnaissance.

Yours sincerely,

Dr. J. Loring Haskell
Principal Investigator
