

8. TESTING, CORING AND LOGGING PROGRAMS:

Drill stem tests will be made when samples, drilling time or logging data are sufficient to indicate a test is warranted.

It is planned that electric logs will include a CNL-FDC with Gamma Ray and Dual Laterolog.

No coring is planned.

9. ABNORMAL PRESSURES, TEMPERATURES OR HYDROGEN SULFIDE GAS:

None anticipated.

10. ANTICIPATED STARTING DATE:

It is planned that drilling operations will commence on or about October 25, with drilling and completion operations lasting about 100 days.
