Energy and Minerals Department
Oil Conservation Division
P.O. Box 1980
Hobbs, New Mexico 88240

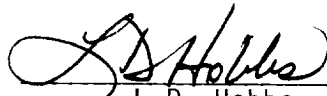

Gentlemen:

This letter is written in reference to your letter, dated March 11, 1983, concerning the Back Pressure Test for the Superior Gulf State Com well No. 1, located in Unit G of Section 32, T20S, R34E, Lea County, New Mexico.

A Back Pressure Test was not run on the subject well due to low producing gas rates and rapidly declining bottom hole pressures. The well is producing from a very limited reservoir and stabilized rates could not be obtained. Bottom hole pressure has since declined to a point at which the well will no longer flow.

If any additional information is needed, please contact us at 915-699-2664.

Sincerely Yours,

L.D. Hobbs
Division Production Engineer
