Gentlemen:

In response to a request for the release of the plugging bond for the above-referenced well we made an inspection of the plugged well location November 19, 1987, and found that the rat hole needed to be filled before we can release the bond.

As soon as this has been done, please sign and return a copy of this letter and we will recheck the location so your bond can be released.

Very truly yours,

OIL CONSERVATION DIVISION
