Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

We respectfully request permission to modify the drilling program on our Federal 11-20-34, well #3 as discussed in the conversation between Mickey O'Hare and Shannon Shaw on April 11, 1988.

9 5/8" - Intermediate String - Casing:

We want to modify the drilling program as follows:

- 1) Installing an external casing packer above the expected lost circulation zone.
- 2) Using a Class C Neat cement to circulate 2nd stage back to surface, instead of using the light weight cement approved in the Application for Permit to Drill.

These precautions are being taken to improve the chances of obtaining a good primary cement job with consideration of expected loss circulation problems and up hole water flow.

18. I hereby certify that the foregoing is true and correct
