The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

7" casing was set at 3699', using 6 centralizers and 57 scratchers, and cemented with 1392 sacks cement. Total depth 3700' in line. Plug down at 9:00 P.M. 3-29-51. Top of cement behind casing 600' by temperature survey.

Rotary tools were moved out and reverse circulation rig moved in. On 4-3-51 tested casing with 1000' before drilling plug. Final pressure 985'. Found top of cement inside pipe at 3667'. Drilled out plug and tested casing with 1000' for 30 minutes. Final pressure 975'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
