RE: Reclassification of Well
State A A/C-2, #47-C
Sec. 5-T22S-R36E
Jalmat Tansill Yates SR Pool

Gentlemen:

According to the most recently submitted Gas-Oil-Ratio Test dated 4-11-99, the above-referenced well will be reclassified from a prorated gas well to an oil well in the Jalmat Tansill Yates Seven Rivers Pool effective January 1, 2000, and the gas allowable cancelled effective that date.

If for some reason you feel this test does not reflect the proper classification of this well, please submit another test for our consideration by September 10, 1999.

If the well is to be reclassified to an oil well in the Jalmat Tansill Yates Seven Rivers Pool, please submit the following:

1. Revised Form C-102, acreage dedication plat, outlining 40 acres
For this oil well completion.
2. Form C-104 showing reclassification from gas to oil effective
January 1, 2000, and designating change of transporter to oil
And casinghead gas.

If you have questions, concerning the above, please contact Nelda Morgan at
(505) 393-6161 Ext. 101.

Very truly yours,
OIL CONSERVATION DIVISION

Chris Williams

Instructions:

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Division.

Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base will be 0.60.

Report casing pressure in lieu of tubing pressure for any well producing through casing.
