New Mexico Operations Director:

Attached is a copy of an administrative application for NMOCD approval of an unorthodox well location and simultaneous dedication in the Eumont YTS-7RVRS-QN (Pro Gas) Pool.

Chevron U.S.A. is planning to recomplete the W.A. Ramsay (NCT-A) #18 from the Eumont Oil Pool to the Eumont Gas Pool. The subject well is located 660' FNL and 1980' FWL in Section 35 of T-21-S, R-36-E, Lea County, New Mexico. We have requested that the NMOCD approve the simultaneous dedication of this well with the W.A. Ramsay (NCT-A) Nos. 3, 7, 10, 12, 13, and 20 which produce on an existing standard 640-acre Eumont gas spacing and proration unit (GPU). This GPU comprises all of Section 35 in T-21-S, R-36-E. Because the subject well is located 660' from the boundary of a 640-acre GPU, we have also requested NMOCD approval of an unorthodox well location.

If you have any questions about the application, please contact Richard Black at (915) 687-7284.

Sincerely,

F.S. Godbold
