Well No. 1 is located 660 ft. from S line and 660 ft. from W line of sec. 1
SW/4 Sec. 1 R-8 T-37-N N. H. P. N.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wilcox Lee New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This is a notice to drill a well with rotary tools to approximately 5100' unless commercial oil or gas production is encountered at a lesser depth. All casing will be cemented with methods approved by the U. S. G. S. The following casing program will be used:

- 13 3/8" 40# N-40 Sals. Now set at 225' and cemented to surface
- 8 5/8" 30# J-55 Sals. (New) set at approximately 3250' (base of salt) and cemented to surface
- 5 1/2" 20# N-80 Sals. (New) set at approximately 5100' (Total Depth) cemented to bottom of 8 5/8"

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Fallerton Oil Company
