Plug leakage at

SHELL OIL COMPANY

Drinkard T/A with blanking plug set in SN @ 5949'. Opened sliding sleeve valve at 5919', pulling Blinbry oil up thru 2" tubing. With 1150 psi on casing and with plug in SN and sleeve still closed, bled tubing pressure from 1700 psi to 37 psi. Tubing pressure remained steady for 2 hours, indicating Drinkard TA.
