13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Conoco ran a Casing Integrity Test on this well on 7/16/99 in order to request Temporary Abandonment status; however, the casing valve was frozen shut, making the test invalid. An NMOCD witness came out and inspected the repairs and noted that the valve has appropriately been replaced and the test is now valid. BLM is in possession of the original chart. (see attached notations made by witness on a copy of the original) This well is ready to be Temporarily Abandoned upon approval.
