Re: Application to Dually  
Complete N.G. Penrose, Inc.  
Hinton #5, Tubbs-Blinbry  
Pools, SE/4, SE/4, Sec.  
12, T22S, R37E, Lea  
County, New Mexico

Gentlemen:

By means of this letter and the attached information, Neville G. Penrose, Inc. hereby makes application to dually complete their Hinton #5, located SE/4, SE/4, Sec. 12, T22S, R37E, Lea County, New Mexico.

This well is now producing from the Tubbs Gas zone at a total depth of 6275'. The plan is to produce Tubbs Gas through the 2 3/8" tubing and Blinbry Gas through the 5 1/2" casing. The procedure to be followed is shown on the attached information sheet and drawing. The attached plat shows the location of said well.

Neville G. Penrose, Inc. believes that the manner and method of dually completing which is shown on the attached sheets, is mechanically feasible and will prevent co-mingling of fluids and gases from the two reservoirs.

By copy of this application all offset operators and interested parties shown on the attached mailing list have been notified of the proposal to dually complete said well in accordance with NMOCC Rule 112-A.

It is therefore respectfully requested that the Conservation Commission grant the applicant permission to dually complete this well in accordance with the rules and regulations of the Commission.

Respectfully submitted,  
Neville G. Penrose, Inc.

By T.H. Bright  
T.H. Bright  
Production Supt.
