## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

We cemented a string of 36 pound 9-5/8" casing at total depth of 1250' with 600 sacks on December 6, 1948. Plug was pumped down at 10:25 A.M. and cement was circulated back into cellar.

We propose to allow cement a set time of 48 hours then go in hole with drill pipe and pressure test casing to determine if cement job is satisfactory. If same proves to be OK we will resume drilling.
