Attention: Mr. L. M. Thompson, Manager, Producing Division

Gentlemen:

On November 19th, 1958, we wrote a letter asking your consent to dual complete a well in the Drinkard and Blinebry Zone, which we are drilling in the NW/4 of the NE/4, Section 24, T-22-S, R-37-E, Lea County, New Mexico.

The Drinkard Zone was found to be non-productive and therefore a completion in that zone was not possible.

It is now our intention to complete this well as a dual completion from the Blinebry zone which is approximately 5470' - 5600' and the Tubb zone which is approximately 6030' - 6228'.

In accordance with New Mexico Oil Conservation Commission rulings we are asking for your consent to complete this well in the above mentioned zones as a dual completion.

If the above is acceptable to you and you waive notice of a hearing, please execute the attached copy and return it to us for filing.

Yours very truly,

CARL J. WESTLUND, INC.

Attention Mr. James W. Brown

Gentlemen:

I wish to advise that Phillips Petroleum Company has no objection to the proposed dual completion of your Danglade Well No. 1, in the Blinebry and Tubb zones. It is my understanding that you originally planned to dually complete this well in the Blinebry and Drinkard zones and that you found the Drinkard Zone unproductive.

As requested by you, I am enclosing two copies of this letter in the event that you may desire to forward a copy to the New Mexico Oil Conservation Commission.

Yours very truly,
