Re: Application to Dually Complete
Gulf Oil Corporation Amanda No. 1
Amanda Pool, Lea County, New Mexico

Gentlemen:

By this letter of application Gulf Oil Corporation wishes to state the following:

- (a) That the Gulf Oil Corporation Amanda No. 1, located in the NW/4 SE/4 of Section 25, T-22-S, R-37-E, was completed May 29, 1947 at a plug back depth of 7174'. The attached Exhibit "A" shows the location of this well on the Gulf Oil Corporation Amanda Lease together with the location of all off-set wells.
- (b) That subject well has 5-1/2" casing set at 7214' and cemented with 200 sacks of cement. The well is a gas well producing from the perforated interval 7065-7090' in the Amanda Pool.
- (c) That the applicant proposes to dually complete the well in the following manner:
 - (1) Perforate the 5-1/2" casing within the approximate interval of 6020-6120' in the Tubb Gas Pay.
 - (2) Set production type packer below these perforations at approximately 6200' to separate the two pay zones.
 - (3) Produce the Amanda gas through the tubing and Tubb gas through the tubing-casing annulus.
- (d) That the granting of this application for permission to produce the well as a dual completion with gas from the Amanda and gas from the Tubb is in the interest of conservation and the protection of correlative rights.
- (e) That the applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.
- (f) That the manner and method of the proposed dual completion is mechanically feasible and practical.

New Mexico Oil Conservation Commission
December 31, 1953
Page 2

(g) That by copy of this letter of application, all offset operators are notified of the proposed dual completion.

(h) That this well is less than one mile outside the area limits of the Tubb Gas Pool. In the event that a commercial gas well from the Tubb pay is obtained, it will be requested that the limits of the Tubb Gas Pool be extended to include this well.

Therefore, Gulf Oil Corporation requests that the Oil Conservation Commission grant permission to the applicant to dually complete the subject well as proposed in this application.

Respectfully submitted,

C. F. TAYLOR
Area Production Superintendent
