Re: Baker "C" #2-G  
Sec. 26, T22S R37E

Gentlemen:

We have this date approved your intention to drill the above-referenced well and also your proposal to amend your cementing program for the 4½" casing.

I want to alert you to the fact that you may encounter a waterflow of 100 to 400 BWPH somewhere in the salt section while drilling this well. You will need to be prepared to deal with such a waterflow. I would urge you to consider having a drillinghead on this wellbore.

If you have any questions or need additional information concerning what to expect, please feel free to call me at (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton  
Supervisor, District I
