NOTICE OF INTENTION TO PULL OR ALTER CASING	SUPPLEMENTARY WELL HISTORY
NOTICE OF INTENTION TO ABANDON WELL	

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

July 29, 1958

Well No. 1 is located 1980 ft. from N line and 1980 ft. from W line of sec. 8

NW 1/4 Section 8 26 S 33 E N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Wilcoat Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3300 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Verbal approval to plug well was obtained July 25, 1958. Well was plugged on July 26, 1958 in accordance with the following approved plan. Total depth of hole was 4898'.

Fifteen sacks of cement were set as a plug at depth of 4610' at base of Castile salt. Fifteen sacks of cement were set as a plug in the Rustler Anhydrite at a depth of 815'. Ten sacks of cement were set as a plug in top of the 8-5/8" surface casing with a regulation abandonment marker set in the top of this plug and extending four feet above the ground level. Hole was left standing full of heavy drilling mud. As soon as pits have dried they will be back filled and the location site will be cleared off and left as nearly in the original condition as is practical.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
