DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Will set cement retainer at 3250 feet and squeeze off bottom section with cement. This well is now making 100% water. It is planned to perforate casing from 29700 to 29900' in effort.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
