FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This well has been drilled to TD 455'. 8 5/8" Seamless casing has been set @ 447' and cemented with 140 sacks of El Toro common cement. Cementing was completed on the afternoon of September 22, 1939.

We propose to allow this well to stand undisturbed for a period of 48 hours. After 48 hours, the cement plug will be drilled and the hole bailed dry. Operations will then be shut down for a period of 1 hour, after which the bailer will again be run to determine if water has accumulated in the hole. If there is no water present, drilling will be resumed on the evening of September 24, 1939.
