Well No. 2 Elliott "FQ" November 30 , 19 53

Well No. 2-F Q is located 1750 ft. from N line and 2310 ft. from E line of sec. 31

31 N 24 E (1/4 Sec. and Sec. No.) 24 E (Twp.) 30 E (Range) 107 W (Meridian)
West Hollaishide (open) (Field) Lee (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a 10-3/4" hole to depth of approximately 215 feet and cement 10-3/4" 40.75# casing on bottom with sufficient cement to circulate back into cellar. We will drill an 8-3/4" hole; below surface casing, to a depth of approximately 265 feet and cement 7" casing on bottom with an estimated amount of cement sufficient to bring returns back to base of surface casing.

We will allow cement time of 24 hours on surface casing and 48 hours on ray string. All cement jobs will be tested in conformity with Federal regulations.

Estimated total depth of hole is 270 feet.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
