17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Geological interpretation completed after drilling the Buckskin Federal No. 1 located 1980' FWL and 660' FSL, Section 18, T24S, R38E, indicates for prudent operations the necessity for moving the Buckskin Federal No. 3 from the previously approved location at 1980' FSL and 1980' FWL to 1650' FSL and 1980' FWL, which is still an orthodox location in the same proration unit. Permission is hereby requested to make this move. The required Archeological Survey is scheduled to be made December 2, 1980, by Dr. J. Loring Haskell, Carlsbad, New Mexico. (Early approval of this request would be appreciated because a rig is scheduled to commence drilling this well in four weeks.)

Re: Restoration of Surface
Buckskin Federal No. 3
1650' FSL and 1980' FWL, Section 18,
T-24-S, R-38-E, Lea County,
New Mexico

Dear Mr. Brown:

I have notified Mr. Clyde Cooper of Jal, New Mexico (owner of the surface land in SW/4 Section 18, T-24-S, R-38-E) of my intention to drill a 6800 foot Drinkard test to be located 1650' FSL and 1980' FWL, Section 18, T-24-S, R-38-E, Lea County, New Mexico. We both agreed that once drilling and completion operations are finished at the proposed wellsite, all pits will be backfilled and leveled, all junk and unnecessary equipment will be removed, and any unneeded access road and drill pad area will be ripped to promote vegetation.

Very truly yours,

Tommy Phipps,
Executive Vice President
