

hosting these prerequisites for even transitory usage. Albeit short lived, more sustained occupation was possible in the Bell Lake area during late Jornada Mogollon times and more specifically during its Ochoa Phase (A.D. 1200-1350). Highly organic midden deposits and house blocks are associated with these resources.

Recommendations

NMAS recommends clearance for Amoco Production Company's proposed road projects and suggests that work-related activities proceed in accordance with existing plans.
