Describe Cause of Problem and Remedial Action Taken.*

1 BBL oil and 1 BBL produced water was released from the stuffing box due to the seal on the rubber packing blowing out. The rams on the well head were closed to prevent further release. The packing was replaced and the well has been returned to operation.

Describe Area Affected and Cleanup Action Taken.*

1 BBL of oil and 1 BBL produced water was released from the stuffing box on top of the well head due to the seal on the rubber packing blowing out. Due to high winds some of oil and produced water was blown into the pasture. The area affected was on the Northern portion of the Pad next to the pasture with some fine mist reaching approximately 461' feet into the pasture. The total affected area on and off pad was 75' wide by 671' long. Vacuum truck was unable to recover any of the released oil and produced water. Environmental agency will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
