If a Watercourse was Impacted, Describe Fully.*
Not applicable.

APPROVED

By Olivia Yu at 10:04 am, Apr 18, 2018

Describe Cause of Problem and Remedial Action Taken.*

A high pressure event in the separator occurred, sending gas and fluids (condensate) to the flare. Less than a gallon of condensate was released out of the flare, igniting two small areas adjacent to the pad. The areas were 10'x5' and 12'x7. The well was shut-in.

Describe Area Affected and Cleanup Action Taken.*

Contaminated soil was scraped and sent to R360 for disposal.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Dear Ms. Carrigan:

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **nOY1803828562** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Good morning Ms. Karrigan:

Thank you for submitting photo documentation of the impacted areas along with the initial C-141.

Please see the attachment for your records. Similarly, NMOCD requests photo documentation of the impacted areas after remedial activities to resolve this incident.

Thanks,

Olivia Yu

Subject: 24 notification

Good evening,

On 01/22/2018, Marathon received a report from a neighboring operator that there was a small fire at our Beckham 19 1 well site in Lea County. When our personnel checked the location the fire had self-extinguished. There was evidence of a continuing problem. Our personnel noticed a small area around the flare that had burned the grass. We are investigating the cause and will submit a C141.

Please let me know if you have any questions.
