If a Watercourse was Impacted, Describe Fully.* N/A		

RECEIVED

By Olivia Yu at 3:22 pm, Jun 29, 2018

Describe Cause of Problem and Remedial Action Taken.*

Fluid was released to lined containment from a hole in the temporary oil frac tank on location. The tank was bypassed.

Describe Area Affected and Cleanup Action Taken.*

The release affected the area within the lined frac tank containment. Free standing fluids were recovered. The containment will be power washed and a final C-141 will be submitted.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
