GAS CAPTURE PLAN

Date: 09/13/2018

☒ Original
☐ Amended - Reason for Amendment: _____

Operator & OGRID No.: EOG Resources, Inc. 7377

This Gas Capture Plan outlines actions to be taken by the Operator to reduce well/production facility flaring/venting for new completion (new drill, recomple to new zone, re-frac) activity.

Note: Form C-129 must be submitted and approved prior to exceeding 60 days allowed by Rule (Subsection A of 19.15.18.12 NMAC).

Well(s)/Production Facility – Name of facility

The well(s) that will be located at the production facility are shown in the table below.

| Well Name | API | Well Location (ULSTR) | Footages | Expected MCF/D | Flared or Vented | Comments |
|-----------------------------|------------|-----------------------|--------------------|----------------|------------------|----------------|
| Wild Weasel 22 Fed Com 701H | 30-025-*** | A-22-25S-34E | 260 FNL & 513 FEL | ±3500 | None Planned | APD Submission |
| Wild Weasel 22 Fed Com 702H | 30-025-*** | A-22-25S-34E | 293 FNL & 513 FEL | ±3500 | None Planned | APD Submission |
| Wild Weasel 22 Fed Com 703H | 30-025-*** | A-22-25S-34E | 260 FNL & 1074 FEL | ±3500 | None Planned | APD Submission |
| Wild Weasel 22 Fed Com 704H | 30-025-*** | A-22-25S-34E | 293 FNL & 1074 FEL | ±3500 | None Planned | APD Submission |
| Wild Weasel 22 Fed Com 705H | 30-025-*** | A-22-25S-34E | 326 FNL & 1074 FEL | ±3500 | None Planned | APD Submission |
| Wild Weasel 22 Fed Com 706H | 30-025-*** | O-15-25S-34E | 324 FSL & 2133 FEL | ±3500 | None Planned | APD Submission |

Gathering System and Pipeline Notification

Well(s) will be connected to a production facility after flowback operations are complete, if gas transporter system is in place. The gas produced from production facility is dedicated to **Enterprise Field Services** and will be connected to **EOG Resources** low/high pressure gathering system located in Eddy/Lea County, New Mexico. **EOG Resources** provides (periodically) to **Enterprise Field Services** a drilling, completion and estimated first production date for wells that are scheduled to be drilled in the foreseeable future. In addition, **EOG Resources** and **Enterprise Field Services** have periodic conference calls to discuss changes to drilling and completion schedules. Gas from these wells will be processed at **Enterprise Field Services** Processing Plant located in **Lea** County, New Mexico. The actual flow of the gas will be based on compression operating parameters and gathering system pressures.

Flowback Strategy

After the fracture treatment/completion operations, well(s) will be produced to temporary production tanks and gas will be flared or vented. During flowback, the fluids and sand content will be monitored. When the produced fluids contain minimal sand, the wells will be turned to production facilities. Gas sales should start as soon as the wells start flowing through the production facilities, unless there are operational issues on **Enterprise Field Services** system at that time. Based on current information, it is **EOG Resources'** belief the system can take this gas upon completion of the well(s).

Safety requirements during cleanout operations from the use of underbalanced air cleanout systems may necessitate that sand and non-pipeline quality gas be vented and/or flared rather than sold on a temporary basis.
