13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

ConocoPhillips Company respectfully requests approval to shut in the wells listed below. The current worldwide supply/demand ratio and lack of storage capacity is compounded by COVID-19. Our expectation is that the current situation will be temporary in nature. We are requesting the flexibility to maintain the attached list of wells in shut-in status for up to one year. This above unit and the wells to be shut in are capable of producing in paying quantities as evidenced by the most recent production reports. We seek to perpetuate unit leases due to the wells capability to produce in paying quantities and that this cessation of production is temporary.

Shut in to begin May 1, 2020. Production will resume when conditions improve and storage constraints ease. Thank you for your time spent reviewing this request.
