If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the bond No. on file with the BLM / BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Reference: Letter 3162.4 (NM-080) Dated January 23rd, 2013

Location size: 274x223, APD drawing 270x235, after downsize 211x212 not 175x150

Downsize as per APD: 95' north and 85' east

On the north side of the pad we could not downsize the 85' plus this was the frontage of the unit and on the east side we could not downsize the 85' due to entrance of location.

The actual anchor measurements on the north are 80-81' from the edge and 79-83' on the east anchors. Therefore Apache Corporation took 81-84' off of the south edge and 19' from the west edge. This location has some erosion issues that can be corrected.

Due to actual measurements, placement of anchors and wellbore the APD requirements could not be met.

Please review the attached documentation for approval. The location will still need to be reseeded, but will do that during monsoon season.
