Resolute proposes to move in a pulling unit on the subject well on May 20, 2013 to pull the tubing and check for the leak that caused an MIT failure on May 16. A message was left on voicemail May 17, notifying the OCD of the MIT failure and Resolute was informed to shut the well in at that time. We intend to set a blanken plug, equalize the fluid level, and visually check the tubing. If a leak is found in the tubing, we intend make repairs and re-test the tubing.
