Design Plan:

A 200 bbl open top steel tank will be rented from Cavalos, and will be used for this job. The tank will be used to circulate water and cement (cement will have sugar added to prevent it from setup up). A 500 bbl steel frac tank will be set to hold fresh water to circulate into the well bore.

Operating & Maintenance Plan:

The tanks will be monitored at all times and will be checked daily to ensure no leaks occur in the tank. The tanks will be walked around daily to look for potential leaks.

Closure Plan:

The tanks will be emptied of all fluids and the fluid will be disposed at R360.
