13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of		
proposed completion or recompletion.		
OXY USA WTP LP respectfully requests 1 year extension on the temporary abandonment status of this well for further evaluation		
of the waterflood unit. OXY has begun implementing a project that includes revitalizing the northern (active) portion of the unit and		
testing potential in the southern (inactive) portion of the unit. The project entails drilling 4 new wells, all of which have been drilled		
and the completions are currently scheduled for June. These wells will decrease the primary production spacing from 40 acre to 20 acre spacing. Along with the newly drilled wells, the wells in the immediately surrounding area will be worked over. There will be 5 producing		
wells re-stimulated with more appropriate completions for the reservoir and 5 injection wells will be cleaned out and stimulated		
to ensure sufficient flooding. In the South portion of the field, Oxy has identified 4 test wells to recomplete in new zones and evaluate the		
potential of the inactive portion o of this well.	f the field. From the results of the project, Oxy will ex	valuate and determine the potential for reactivation
