BUREAU OF LAND MANAGEMENT Carlsbad Field Office 620 East Greene Street Carlsbad, New Mexico 88220 575-234-5972

Conditions of Approval

Agua Sucia, LLC. Brooks Federal #3, 4, 6, 7

1. Submit plan for approval of well operations within 30 days of this approval to change operator.

The Bureau of Land Management (BLM) and Minerals Management Service (MMS) definition of a Shut-in (SI) or Temporarily Abandoned (TA) are as follows. Shut-in well is a completion that is physically and mechanically capable of production in paying quantities or capable of service use. The definition of a temporarily abandoned well is a completion that is not capable of production in paying quantities but which may have value as a service completion.

43 CFR 3162.3-4 (C) requires that wells incapable of production in paying quantities be promptly plugged and abandoned and requires approval for any well temporarily abandoned for more than 30 days.

Therefore an Operator must submit a Sundry Notices as a Notice of Intent prior to beginning any operation it will be approved with condition of approval attached to properly TA the well. You need to submit a plan for the well within in 30 days stating you intent for the well.

Do one of the following.

- a. Return the well to production or beneficial use.
- b. Submit notice of intent to plug and abandon.

If you decide to **plug and abandon** the well do the following. Submit a Sundry Notice (form 3160-5, original and 3 copies) describe the proposed plugging program.

If you decide to **return the well to production**, submit a Sundry Notice (form 3160-5, original and 3 copies) of intent. Include the date you anticipated the well being placed back in service. 43 CFR 3162.4-1(c) also requires you to notify the Authorized officer, not later than the fifth business day after production is resumed for any well which has been off production for more than 90 days, the date on which such production was resumed. Notification may be by letter or Sundry Notice, or orally followed by letter or Sundry Notice.

- 2. All electrical lines going to well must be buried or placed on power poles as per electrical code.
- 3. Test all production flow lines for leaks prior to placing well on production.
- 4. Tank battery must be bermed/diked (must be able to contain 1 1/2 times the volume of the largest tank) and must be lined with a 20 mil. liner placed under tanks to contain spills.
- 5. All above ground structures and equipment on the lease shall be painted Shale Green (5Y 4/2). This is to be done within 90 days, if you have not already done so.
- 6. Submit for approval of water disposal method.
- 7. The following test must be performed on all wells prior to being placed on production or injection.

Description of the CIT/MIT test requirements

- a. A bridge plug or packer must be installed as close to 50 feet above any open perforations or open hole as possible.
- b. The wellbore must be filled with corrosion inhibited fluid and pressure tested to 500 psi. The casing shall be capable of holding this pressure for at least 30 minutes.
- c. All downhole production/injection equipment (tubing, rods, etc.) shall be removed from the casing if they are not isolated by a packer.
- d. A bradenhead test must be conducted. If the test indicates a problem exists, a remedial plan and time frame for remediation shall be submitted within ninety (30) days of the test.
- e. Contact the appropriate BLM office at least 24 hours prior to the scheduled CIT/MIT test. For wells in Eddy County, 575-361-2822
- 8. All injection wells will require prior approval from BLM and NMOCD prior to placing back on injection.
- 9. This agency shall be notified of any spill or discharge as required by NTL-3A.
