13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

1. EOG had contracted Talon/LPE to do reclamation activities on a produced water release from a flow line serving the Diamond 8 Federal Com No. 4H, an active well location. A site plan is attached.

2. On 11/16/2012 Talon/LPE personnel mobilized to the site to begin closure soil sampling activities on the bottom and sidewalls of the excavation per NMOC requirements. Grab soil samples were collected and the soil samples were sent to Cardinal Laboratories for analysis. The results for the soil samples are attached.

3. The Impacted soil was excavated to a depth of 1-foot deep and was transported to an approved disposal facility. Confirmation samples were obtained upon completion.

4. Upon approval from the BLM/NMOC, the area was backfilled to grade using new soil from a local borrow pit.

5. The area was contoured to match the surrounding terrain and reseeded using the hand broadcast method with BLM #1 seed mixture for the area. Seeding labels are attached.
